

The Umbarger Pellet Advantages

• Nutrient Dense

Highly fortified with vitamins and organic trace minerals, added vegetable oil, and quality protein sources; all allow you to feed less.

• Yeast

Research has shown that the addition of yeast in a horse's diet will increase the efficiency of fiber digestion in the hind gut allowing the horse to become more efficient at feed utilization.

• Pellet Form

Easy to handle, improves shelf life, prevents sorting.

The Umbarger Horse Feed Advantages

Fresh Steam Flaked Feeds

Fixed Formulas

The formulation of Umbarger horse feeds never changes. Substituting for lower cost ingredients is not permitted. This means the aroma, texture, and look is the same bag after bag.

Balanced Calcium and Phosphorus

A balanced calcium to phosphorus ratio (2:1) is required for maximum bone growth and maintenance.

Vitamin and Trace Minerals

A high level of these nutrients is needed for optimal growth of bone and tissue in young stock and for maximum tissue rebuilding in highly active horses like those in training or racing.

Elevated Levels of Vitamin E

Vitamin E and the other antioxidants help prevent cellular damage due to high levels of exercise from activities like training or racing.

Flaked Grains

Umbarger's utilizes steamed flaked grains (corn, barley and oats) in all our textured horse feeds. This steam flaking process causes gelatinization of the complex starch molecule rendering it more digestible. This change pre-digests the grains so that when fed, it becomes 95% digestible as compared to 80% digestibility of whole shelled corn.

Horse Ten

Complete Feed for Maintenance Horses

GUARANTEED ANALYSIS

CRUDE PROTEIN, min.....	10.0%	PHOSPHORUS (P), min.....	0.4%
CRUDE FAT, min.....	3.0%	COPPER (Cu), min.....	13 ppm
CRUDE FIBER, max.....	5.0%	SELENIUM (Se), min.....	0.2 ppm
CALCIUM (Ca), min.....	0.4%	Zinc (Zn), min.....	60 ppm
CALCIUM (Ca), max.....	0.9%	Vitamin A, min.....	2,500 IU/LB
		Vitamin E, min.....	13 IU/LB

Feeding Directions:

Feed 1/2 to 1 lb. of "Horse Ten" for each 100 lbs of body weight, along with good quality hay. Horses in light use should be fed the lower level with extra hay; horses in heavy use should be fed the higher level with less hay. Free choice mineral, salt and clean, fresh water should be made available at all times.
